Come at BITS, explore our clubs (we have more than 100 clubs), and achieve what you want.

Placements: Around 40 companies come for core placements in the mechanical

✈ **shiksha**

department offering between 8-15 lakhs. Many international stations offers above 25 Lacs too but only 5-10 students get those. Average in core is Rs 7-8 LPA and median is Rs 6.9 LPA in core, specifically. BHEL, ISRO, Mercedes Benz, Toyota, Maruti and Ashok Leyland offered the most and recruited around 30% top performing students in total offering between Rs 10-20 LPA.

Infrastructure: Infrastructure is in process as many hostels are given a modular look and toilets are increased to accomodate. Labs and classrooms are really spacious (200 students in a single sitting). Wi-Fi is good offering 6GB at 30-40MBPS. Mess food is good and by my experience, better than DTU, IIT Delhi and NSUT.

Faculty: The best part of BITS is the faculty. 80% are post-doctorates from top universities around the world like MIT, CIT, Stanford and London school of business. They can give you an opportunity to work under them if they find zeal in you and this experience counts a lot in jobs. Exams are intuitive as BITS follow MIT academic structure so if you are good in concepts, you will ace.

Other: The crowd is better than IIT here and the startup culture ranking is 3 in India. You can study many courses such as CSE, Finance, etc., irrespective of your degree. Though you need a good score for that.

Review of BITS Pilani - Birla Institute of Technology and Science.

Placements: I belong to the HSS department, and the placements are not very great since it's an engineering institute. However, a few of my seniors got placed as assistant professors and research associates at state universities and private companies such as Amazon.

Infrastructure: The Meera Bhawan girls' hostel is an average hostel, not very great in terms of infrastructure. However, the mess food is really good in quality. The HSS department is very well maintained at NAB, which is the newly constructed and well-equipped academic block. Everything else like library, sports, and classrooms are really good are well-maintained.

Faculty: The teachers are highly qualified as some of them have even passed out from good universities abroad. However, the teaching methods differ from one professor to another depending upon the requirements of the course. During PhD, your coursework is

decided by your supervisor in relevance with your area of interest and your supervisor's research area.

Other: If you can pay the high fee, then the exposure at BITS, Pilani, is simply another level of awesomeness. From the campus crowd, activities to events, BITS helps students in the holistic development of their personality.

★★★★☆ Placements 3 ★ Infrastructure 5 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 5 ★

Infrastructure, Faculty, Students are all great. BITS Pilani It's MAGIC!

Placements: 90% of the students were placed as Senior Software developer. 43 lac was the highest, 4 lac was the lowest, and 11 lac was average package. Top recruiting companies were Goldman Sachs, Google, Uber. Around 95% of students got an internship from my course. Internships varied from Bajaj, Mahindra, and other great companies. Placement Statistics were really good last year.

Infrastructure: We have Electric Geysers and Solar Panel powered Hot water facility. Labs are really well maintained and our pride is the great OYSTER LABS! Classrooms are really well maintained and lectures are recorded and are available to us on online platforms. Library is a very well-organized place and you can study really well in a peaceful environment. We have over 200000 books available at our perusal. Quality of food is good in mess and canteen are really great and we have about 4 eateries on campus and they serve great foods at an affordable price. There is a Medical Centre where we have great doctors. GYM Grounds have approximately all sports types of equipment and students play with great enthusiasm.

Faculty: Yes, the teachers are really helpful and they support students at all times. Most of the faculty members have a Ph.D. and are really qualified. They also have a good knowledge of pedagogy. Classes are really interactive and students look forward to attending classes first thing in the morning. Every Professor has chamber consultation hours in which students can go and discuss their doubts and concerns about their course.

Other: I'm very passionate about Physics and this course got my attention and I got to about the amazing faculty here. This course should be more inclined towards industrial applications. Fests are mesmerising in this college and they occur in an organised manner such that students don't get bored with the monotony of the course. There are 3 fests in this college OASIS (Cultural fest), BOSM (Sports fest), APOGEE (Technical fest). Campus

crowd is very interactive and I have a very intelligent peer group here. Connectivity is a little low as it is located in a remote area. Scholarships are great and students work really hard to get them.

Bits Pilani, door to a million opportunities.

Placements: Every student who applied for placement got some job. The highest package was about 44 Lacs, the lowest 4 Lacs, and average around 17-20 Lacs Microsoft, Goldman Sachs are the top recruiters. About 70 percent of students got the internship. Apart from this, Many students have also been invited by other foreign universities (from the USA and Germany) to carry out the research.

Infrastructure: Wi-Fi is quite fast. Labs are well equipped, although some equipment in the physics lab are very old but still they work fine. Apart from that, all the labs are quite fine. Library according to me is the unique selling point of our institute. Books covering all genres are available here.

Faculty: The teachers are quite helpful and also have good knowledge of their respective subjects. Almost all the professors have a Ph.D. Degree. Teaching standard is on par with the IITs. The course curriculum is very relevant. All the courses are reviewed every year to make necessary amendments.

★★★★★   Placements 5 ★   Infrastructure 5 ★   Faculty & Course Curriculum 5 ★   Crowd & Campus Life 5 ★

It is a good college with good infrastructure and has all the facilities.

Placements: In 2019 there was 100% placement in our Course specifically M.Sc. Economics (Hons) + BE computer science. Exact data is not provided, but the average salary package offered in placement was around 15-20 LPA. The highest salary package offered was 98 LPA by Uber US the lowest salary package offered was between 10-12 LPA. Companies like Amazon, Microsoft, Deshaw, Uber, etc., visited the campus. Almost 100% of internships were offered by companies like Amazon, Flipkart, Facebook, Uber, etc.

Infrastructure: Wi-Fi facility is very good with around 15 Mbps speed. Labs are good

shiksha

structured, and classrooms are huge. Labs and classrooms are centralised air-conditioned. Desk and chair are good and strong. The library is best, and it is 2nd largest in India and has wonderful collections of all types of books and well organised with a perfect system. Sports facilities are very good different grounds for a different sport is available. Mess food is also a good and different menu for every day and canteen is also a decent one.

Faculty: Teachers are well qualified, very helpful and highly knowledgeable. Teaching quality is the best. The course curriculum is highly relevant, and it is perfectly structured, and the environment and course structure together make students industry-ready. The course is designed in students friendly nature, and it has all the details and students can study according to it.

Other: I have chosen this course because it was very appealing to me, and its course content is also very interesting, and its placements are also decent. I don't think anything would be better than this. Almost 3 major events are conducted 1 sports fest named Bosm, 1 cultural fest named Oasis and 1 technical fest named Apogee. Campus crowd is perfect, it is what freshers expect for, and It is very competing. Connectivity is difficult but manageable. Campus surrounding is also good. Institute provides two types of scholarship merit and merit cum need (MCN). There are many clubs and departments covering mostly all the extracurricular activities and also sports teams.

★★★★★   Placements 5 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

Overall, our college is very good.

Placements: Almost 99.9% of the students from our course got placed. The highest salary package offered in our course is 40 LPA by PhonePe in Bangalore. The average salary package offered is 12 LPA, and the lowest salary package offered is 10 LPA. A top recruiting company that visit our campus for placements is Amazon. About 90% of the students got an internship in different product-based companies.

Infrastructure: Our college provides good facilities in the labs. Labs are very good. Wi-Fi facility is available along with LAN cable at a 20 Mbps speed. Classrooms are well-maintained. There is no attendance rule. The hostel facility is also good, and the food served in the mess is also good. Students get food 4-times, and night mess is also available. Some times we get Manchurian and sandwich, and some times pav bhaji. It serves awesome and tasty food. The library is well-maintained. E-library is also available here.

shiksha

Many books are available in the library.

Faculty: All faculty members in our college are PhD holders and doctorate. Their teaching quality is very good. It is a very good college, so the teachers are very helpful. Students need some effort for placement. The course curriculum is relevant, and all teachers guide for interview preparation.

Other: I had chosen this course because of my interest in coding and also in computer science when I was 10 years old. My dad gave a computer to me, so my dream is to get placed in the software company. Events and fests are held every year. All coding competition and extracurricular activities are conducted here. Seniors are very helpful. The campus is very beautiful and lush green.

Placements 2 ⭐ Infrastructure 5 ⭐ Faculty & Course Curriculum 5 ⭐ Crowd & Campus Life 5 ⭐

It is an excellent institution with the best teachers, and students must follow them.

Placements: Very less percentage of students got placed but not in core companies. The highest salary package offered is 7 LPA. I am from the biotechnology field, and very few companies visited here for placements. The practice school was good, and they offered our seniors good research institutes and companies.

Infrastructure: The infrastructure of our college is good. We have fully air-conditioned classrooms with projectors, and labs are well-structured. The campus is big, so you have to walk a lot. You cannot explore the whole campus in one day. We have a well-defined medical care centre. There are many small food centres.

Faculty: Education is good over here, and they have the best facilities. Faculty members here are very cooperative, and they will provide you notes. The evaluation is both closed and open book type so that you can gain a lot of knowledge over here. Lab exposure is good, and you will learn a lot from practical knowledge. Faculty members over here will teach you how to troubleshoot things. This course curriculum is relevant.

Other: I have chosen this course because I want to be in the research field. Fests and technical events are conducted well over here. You will be enjoying this place a lot.

★★★★☆   Placements 4 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

Our college has a good infrastructure, faculty members and course structure.

Placements: For ME, the placement scenario can be improved. On-campus placements are less than expected, but our seniors got placed in good companies. A majority of the students also opt for research-based studies, later on, and faculty members are also more focused on research progress, which is good if you plan to pursue a PhD later on. You can also put a practice school according to your choice in the final semester, and you can also invite new companies with your own effort.

Infrastructure: The library is very good, and the Wi-Fi facility is decent as far as I know. Classrooms are also well suited and comfortable. ME hostels are good, and the hostels which aren't good are being renovated now. The food served in the mess is decent. There are also medical and sports facilities. There is a gym on the campus and also a swimming pool. But I don't have the first-hand experience of these facilities.

Faculty: Teachers here are very well qualified, very helpful and are ready to give suggestions. They try to make classes interactive. For ME Biotechnology, courses are mostly research-oriented. The course curriculum is flexible and relevant, and professors try to include recent advances in their courses.

★★★★★   Placements 5 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

Great campus life for all round development.

Placements: 99% get placed. All top companies like Cisco, NetApp, Samsung, Microsoft, GE comes for placements. Highest package : 30lpa, average:14lpa, lowest: 7 lpa. 100% get internship in some or other companies given the broad network the college has. Roles were SDE, Analyst.

Infrastructure: Departmental facilities are excellent with good Wi-Fi, world class library, labs and other research infrastructure. Hostels are excellent with good amenities. Mess food is mediocre. Excellent facilities for medical needs and sports are there inside campus.

Faculty: Teachers are really qualified with above average teaching skills. They are quite

knowledgeable. Course curriculum is really intense and challenging that would definitely make student industry ready. But it gives a lot of mental stress to students.

Other: I have chosen the course because it offers good placements. Stress given to students can be minimized. Connectivity is really bad. All other fest and extra curricular activities are really great here.

★★★★½   Placements 5 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 4 ★

It has good faculty, placements, campus, and amazing peer group, but the fee is really very high.

Placements: The placements are top-notch and are neck to neck with IITs. There are 100% placements for my branch every year. Every year, big companies like Amazon, Google, etc., come to recruit the students here. According to the recent placement report released in BITS, the average package offered to a CSE graduate from BITS Pilani is around 18 LPA, which is excluding the offshore salaries, i.e., excluding the 1-1.5 Crore packages (as they are just converted from their US dollars to Indian rupees and do not give a fair idea about the average package).

Infrastructure: The infrastructure is very good. Hostels are very clean, but they are not air-conditioned. The classrooms are neat. We have one of the best libraries in India. Mess food is decent. Sports facilities and medical facilities are quite good.

Faculty: Most of the professors in BITS Pilani are really good, although exceptions do exist. Their teaching quality is quite good. The course curriculum is relevant. We are sent for PS after the second year and at the end of the first year, which helps students become industry-ready.

★★★★½   Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 5 ★

Review of BITS Pilani - Birla Institute of Technology and Science.

Placements: BITS Pilani is on top in terms of placements. Almost 100% of the students in computer science and circuit branches like EEE and ENI get placed. In recent years, there is an increase in placement stats in the core branches as well. The median salary package

offered in computer science is about 18 LPA, and it goes to around 6-7 LPA in other core branches. The highest salary package offered by Samsung in this placement season is 40 LPA. Finance companies like American Express and Credit Suisse also recruit students from BITS with financial analysts role. BITS provides each student with two compulsory internships, i.e., PS1 and PS2, where PS stands for practice school. PS2 is offered in the 7th or 8th semester, depending on your preference. Most of the companies offer a pre-placement offer if you perform well. Notable companies like Apple, Amazon and Nutanics offer internships in PS2 based on your GPA. This year summer internship season was a grand success as well. Most of the 3rd year students are hired as interns in reputed organisations like Uber, DE Shaw, Goldman Sacs, Microsoft, Cisco, etc. I got an internship opportunity in Samsung R&D. These companies also offer placements based on your performance. Thus for a computer science graduate, there are three ways of getting placed. The first is through the standard placement season in their final year. The second is a placement offer through summer internships at the end of the third year, and lastly through a placement offer in PS2. Thus the computer science branch has 100% assured placements.

Infrastructure: Hostels in BITS have spacious rooms, fast Wi-Fi, common rooms with television, TT court and snacking machine. There are also courtyards within the hostels with badminton and volleyball courts. Almost all the old hostels have been renovated. The mess is clean, hygienic and provides healthy food. There are eateries like All Night Canteen, Looters, Mr Idli and Taste of the town within the campus. Small cafes and eateries like Pizzeria, Sandpipers and Sunshine are available outside the campus. Sports and fitness facilities include a gym, badminton courts, squash court, swimming pool, basketball court, football field and 400-meter running track. However, I think that there is a need to be more sports facilities considering an ecosystem of around 5,000 people. Classrooms have comfortable seats and equipped with tools like projectors, microphone, etc. Some classrooms have air-conditioners as well. The library has a tranquil environment and a plethora of resources, and it also has an e-zone, brainstorming room and coffee machine. Labs have state-of-the-art technology. There is an ambulance which is available for 24x7 for grave medical emergencies. However, for minor problems, there is a medical centre.

Faculty: Faculty members in our college are well-qualified, and their pedagogical techniques are good. They are always willing to help and take a step to clear your doubts. The course curriculum, however, needs to improve further to make us more suitable to the industry. However, there is a problem that exists in all colleges, as the gap between academia and industry can never be truly bridged. You can always work on projects under professors from any department and gain insights. BITS also provides zero attendance policy for classes,

so you are free to attend the classes which you want. All students get 5 open electives in which they can choose 5 courses from any department.

Other: The peer group in BITS is above-average, which promotes healthy competition. You can join various clubs and departments on the campus, which provides you with a platform to showcase your skills. BITS also has scholarships for meritorious students, and you can get up to 80% off on your tuition fees. There are also scholarship schemes for needy students. Oasis, which is the annual BITS cultural fest, is the second-best college fest in India. The experience is mesmerizing. The fest continues all night and includes games, competitions and performances by top-notch artists like Shankar Mahadevan, Vishal and Shekhar, etc. Students from all over India visit here to attend this fest.

Review of BITS Pilani - Birla Institute of Technology and Science.

Placements: Almost 90% of the students got placed in 2018. The highest international salary package offered was 96 LPA by Uber. The lowest salary package offered was around 4 LPA to 5 LPA for the students of the civil department. Placements are decent for IT and finance departments. Placements are average for the core branches.

Infrastructure: The college has a really good infrastructure. The labs are really cool and well-maintained. Wi-Fi available in the hostels is a bit on the slower side. The institute provides awesome sports facilities for all types of sports, and proper equipment is available. The food offered in the mess is decent except for some meals.

Faculty: Most academic departments have exceptional professors. The course structure is updated according to the current industry needs. Slide shows, videos and models are used as a part of teaching. BITS is famous for the practice school system which provides us with industry exposure, and we emerge as the first destination for recruiters. Faculty to student ratio is 1:30 for tutorials.

Other: Our college organises three major fests, sports fest named BOSM, technical fest named APOGEE and cultural fest named OASIS. You have a great time during these fests. The college provides merit-based scholarships for all students and especially those of weaker economic background. The campus crowd is really great, and you encounter people from every possible place of the country.

The college provides good placements and highly educated faculty members.

Placements: Almost 100% of the students get placed every year. The highest salary package offered is 50 LPA, the average salary package offered is 20 LPA and the minimum salary package offered is 10 LPA. Top recruiter companies are Google, Amazon Sprinklr, Cisco, Samsung, Microsoft and many others. This college is the best to fulfil your dream.

Infrastructure: Our college infrastructure is very good and one of the best college in India. The hostel renovated in last five to 6 years. Single and sharing rooms are available in the hostel. There is also a playground for basketball and cricket. Computer labs are very good, and the library is very neat and clean, so without any disturbance, you can read. Medical facilities are also available in our college.

Faculty: Faculty members of our college are well-educated and well-qualified. They all are very helpful, and they tried to solve students' issues. They provide us with the right path for the future. Their teaching skills are very good and effective. The course has labs and projects, and it is highly relevant.

Other: The college conducts one of the best fests in India. Our college also organises many events and provides a high number of opportunities with a high number of study.

Reviewed on 14 Jan 2020

4.6
⭐⭐⭐⭐½   Placements 5 ⭐ Infrastructure 5 ⭐ Faculty & Course Curriculum 4 ⭐ Crowd & Campus Life 5 ⭐

You'll enjoy the journey here.

Placements: In the circuit branches, almost 100% of the students get placed while in other branches, over 90% of the students get placed out of the registered students. The remaining students also get lucrative off-campus opportunities because of the college reputation. The highest domestic salary package offered was 54 LPA. The lowest salary package offered was 5.5 LPA while the average salary package offered for all the branches is 12 LPA. Google, Microsoft, Turtlemint, Springer, HUL, Exxon Mobil, ISRO etc., visited the campus for placements and internships. Most of the students were placed as software developers, analysts, consultants; while finance and core sector also witnessed a satisfactory record. The average salary package offered in core chemical was about 10 LPA, which is quite good in accordance with the core industry. Moreover, all the students from every branch secure 6 months internships owing to the unique PS system of BITS.

Infrastructure: Both the hostel rooms and the mess food are quite good and hygienic in comparison to IITs and NITs. Most students also get a single-sharing room starting from 2nd year itself. Each hostel has two open spaces for sports facilities called QTs. The library is huge, and housing over 1 Lac books in addition to research facilities provided to the students., and its building itself is iconic. The campus is enabled with Wi-Fi which is accessible everywhere. Each department has its own labs which are currently under renovation; the best thing is being in EEE and biosciences department.

Faculty: Most of the teachers here have their PhDs from foreign universities and are ever ready to solve students' queries. Some of them may be a bit monotonous in their classes, but that's the story of every institution. The course structure is revised after the feedback from the previous batch, so it's kind of satisfactory. Even the PS system for the internships provide much-needed industry exposure to the students.

Other: Core companies, including iconic names like PSUs, do visit the campus. The college hosts the 2nd best cultural fest of India, The Oasis.

★★★★⯪   Placements 4 ⭐ Infrastructure 4 ⭐ Faculty & Course Curriculum 5 ⭐ Crowd & Campus Life 5 ⭐

College culture and campus life are great, and teaching facilities are excellent.

Placements: About 80% of the students got placed. The average salary package offered is 13 LPA, and the highest salary package offered is 40 LPA by Daikin for the mechanical course. Roles offered are decent for mechanical course students. The average salary package offered is higher this time for the mechanical field than non-core sectors like IT and consulting. IT placements for the mechanical field vary by portfolio.

Infrastructure: The hostel for 1st year is average, but it gets better. Hostels are equipped with LAN with a 10 GB per day limit, and from the 2nd year, hostels are Wi-Fi equipped. There is a swimming pool, gymnasiums, sports fields and shopping centres. Mess food quality is above average with a lot of varieties.

Faculty: There is no attendance policy. You can still give exams if your attendance is below 75%, as in other colleges, without any repercussions. Still, grading is tough, and the average grade ISC is 6 GPA instead of B 8 GPA. I wish the college to updated the course curriculum since 2019 batches. The new mech curriculum is more modern and tech-oriented instead of traditional. There are two exams, i.e., mid-semester and comprehensive exams. Tutorial tests may be a surprise in nature.

The teachers are highly qualified, and they are good.

Placements: I am in the 2nd year of my course now, so the placements are good according to the students of our senior batch. Mainly cgpa is considered if you score six above you get the opportunity in core companies or else you will get an opportunity for software jobs. The highest salary package offered is one crore, and the lowest salary package offered is 10 LPA. The average salary package offered is 15 LPA. Companies like L&T and GMR, etc., have visited our campus for placements. To get an internship you must score above six cgpa, but no stipends are offered. If your performance is satisfactory during the internship, then you will be offered to join the company as a permanent employee. Many students from our senior batch got placed through internships.

Infrastructure: If you want good infrastructure, you should prefer the Hyderabad campus. If you want good placements, then Pilani campus is the best. I am from Pilani campus, so

🔺**shiksha**

here classrooms are centrally air-conditioned. Sports and games facilities are good, and many events are organised like BOSM, and I BOSM. Medical facilities are not that good, and the labs are highly equipped. The food is average. Hostels are renowned now slowly, renowned hostels are good. We face water problems sometimes.

Faculty: The teachers are highly qualified, and they are good. The teaching methods used are lecture slides, reference books and projecting some technical videos to teach the classes. The student to faculty ratio is 50:1. The college provides industry exposure. The course curriculum is useful, and the subject is useful to get jobs and competitive exams. Teachers efforts are good, but results will depend up on students perfomance.

Other: The college organises a sports fest named BOSM and a cultural fest named OASIS. They also organise a technical fest named APOGEE. They also conduct an inter-college sports meet named I BOSM. The fests organised in Pilani are joyful and mostly recognised by Indian institutions. The campus crowd is about 2,500 students including the students of all the branches. The campus has spread over almost 300-500 acres. Scholarships are provided based on the CGPA of students. Every day, some programmes will be conducted by the college for our refreshment

Review of BITS Pilani - Birla Institute of Technology and Science.

Placements: Almost 93% of the students who applied for placement get placed. About 7% of students opted out after receiving off-campus offers. The highest salary package offered by DE Shaw and sprinkler is 50 LPA. The lowest salary package offered is 5.5 LPA, which is mainly offered by core companies. The average salary package offered is 15 LPA. Top recruiting companies like DE Shaw, Microsoft, Amazon, Flipkart, Wells Fargo, Jio, Media. Net, etc., visit our college to hire students. Around 40% of students got a summer internship in companies like Google, Microsoft, Cisco, DE shaw, Samsung, etc. The rest students got their 6 months internship through the practice school programme in notable companies like Cohesity, Nutanix, Samsung, Flipkart, Amazon, etc. Top roles like software development engineer, data scientist, data analyst, etc., are offered to the students.

Infrastructure: The Wi-Fi speed can be termed as good but not so great due to being heavy traffic. Due to this, there is a cap on the daily usage of data. Labs have the required equipment with a new workshop centre opened. Classrooms in a new academic block have a

state-of-the-art infrastructure with an air-conditioned facility in every classroom. The library is well-structured with excellent service.

Faculty: Most of the teachers in the department are helpful, with some exceptions. The teaching quality of some professors is of excellent quality, while some are average in delivering the course. The course is equally divided into two categories. Half of the courses are more relevant for higher studies like real analysis, topology, ordinary differential equation, etc. The rest half of the course is more inclined towards computer science like discrete mathematics, graph and network, probability and statistics, etc. This course is quite useful for the SDE role. Exams in BITS Pilani is relatively graded. So, the difficulty level of the paper is high for the end semester exam, but the grading is done relatively. Therefore, grading becomes tough with C grade, which is 6 out of 10 provided on scoring average marks in the course. The passing grade is D, which is 4 out of 10.

Other: I have chosen this course because mathematics is quite in demand in IT Industry. Therefore, mathematics helped me in preparing for SDE roles. The mathematics course structure is such that half of the course is relevant for the computer science field. The inclusion of more CS-related courses like object-oriented programming and machine learning improve the subject demand a lot. Our college organises a fest named Oasis, which is the 2nd largest cultural fest in India, and it is 96 hours continuous event, which will make anyone fall in love with BITS. Technical events like APOGEE is very popular too, where students showcase their technological talents. The campus crowd is very supportive. The club and department culture make it worth being in BITS. The connectivity is poor as the railway station is 25 kilometres away from the college and trains are not so frequent. The bus is of poor quality, and if one wants to get to New Delhi. The average time from New Delhi is 4-5 hours. BITS has a merit scholarship programme in which people whose fathers income is less than 11 lac will be awarded a scholarship based on CGPA.

I am absolutely satisfied, but the college is a bit costly.

Placements: Overall, the placements for non-core branches are decent here. The placements for IT are very good, and many reputed firms like Google, Microsoft and Amazon recruit many students. From core electronics, Nvidia and Texas Instruments hire. From the finance sector, JP Morgan, Goldman Sachs, Nomura, Credit Suisse, Deutsche

---

Bank, etc., and firms like Flipkart, Adobe, etc., visit here. This time, even BCG visited here.

Infrastructure: The infrastructure is very good here, and there is Wi-Fi in the hostel, mess and academic block. The library is very good and is open until 2:00 am at night. The quality of food served is decent, and vegetarian and non-vegetarian food are separately served. The breakfast is very good, and every day something different food items are included on the menu.

Faculty: The faculty members are very knowledgeable and capable of solving all the doubts. The course curriculum is relevant, and for finance, the syllabus helps even in exams like CFA and FRM. The exams are normal, and if students give their minimum effort, they pass. It is relative grading, and the grade is given accordingly.

Other: Fests are one of the best in India. The best part is economics that we get to explore a very good subject along with engineering, and it adds value.

Bits Goa - A Heaven among engineering colleges.

Placements: Placements of our college are top notch. All the best IT and finance company come here to recruit. Even some of the best core companies come here to provide career and growth opportunities. All of the students here get placed and the average CTC of our college is around 12-14 LPA.

Infrastructure: Hostel quality is really nice some of them are brand new and are renovated recently. The mess food is decent but there are night canteens and eateries where you can order all sorts of food that you wanna have. Even fir special craving you can order from Zomato. Classrooms and Wi-Fi are top notch too.

Faculty: All of the teachers at bits are from highly reputed institutions they have done their Masters and Ph.D. from great and known universities They are very helpful when it comes to clearing doubts etc. The course curriculum is set so decently that hardly any of us get any problem while doing our Bachelor's.
