Good infrastructure, highly qualified faculty.
Placements: More than 90% of students get placed. The highest package goes around 45
LPA and the lowest package is around 6 LPA. Top recruiting companies Google, Amazon,

✦shiksha

Microsoft, Qualcomm, etc. 100% of the students get internships from companies like Qualcomm, Honda, Birla, Google, Hero etc.

Infrastructure: The infrastructure is really good. Wi-Fi is available for everyone to use and has a good speed. Labs are fully air-conditioned and have the proper equipment. The library is always stocked with books of students' requirements. Hostel food is edible and can be adjusted. Canteen food is fine.

Faculty: Teachers are highly qualified and very knowledgeable of the subject. They are helpful and kind towards the students. The curriculum is well balanced and gives an individual complete knowledge of the subject and it definitely makes the students industry-ready. Semester exams are not too difficult. The passing percentage is 40%.

Absolutely dissatisfied because the faculty members are not updated.
Placements: 2020 batch is the first batch of NSUT east campus, so the placement data is available in 2024. Most probably, the placement drives are conducted on the NSUT main campus. This information is provided by NSUT.

Infrastructure: According to the college data, all the facilities are available and good, but we experienced the truth. Drinking water is also bad. Wi-Fi is not available for students. Faculty members are unable to use this Wi-Fi when needed. They have to use their personal mobile internet.

Faculty: The faculty members are very old. Even in 2021, they use PPTs and PDF notes of 2006 to teach. In online classes, they play YouTube videos to teach us. Overall, the faculty members are not up to date with the present technology and curriculum.

Placements 4 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

🎓 shiksha

I am satisfied with the faculty members, campus, amazing infrastructure, and college life.

Placements: Approximately 80% of the students get placements here, and the rest are those who opt for higher studies or government exams like GATE or CAT. Internships are also offered from college only, and the highest stipend is 2 lac per month which is provided by Sprinkler.

Infrastructure: The college has a huge infrastructure. Even the sports complex is huge where we can play various games outdoors and indoors. There are basketball ground, football ground, tennis court, badminton court, cricket ground, running tracks, billiard, and many more. There is a good canteen everything is suited to students pocket, and food served is also tasty and good.

Faculty: Everyone knows that NSUT is a government-aided college hence professors are not so good at teaching like they have proper qualifications and, they are good, but unlike in private colleges you have to study here by yourself. The course curriculum is still not updated, but if you study hard you will achieve good grades.

Other: I chose this course because I was interested in mechanical and DTU having the best faculty for mechanical in Delhi. It is a tier 1 college where placements are so good, and the fests held are amazing. We have fests every month, and they are amazing. Great EDM nights and pop nights are also organised.

3.8 ★★★★★ Placements 4 ★ Infrastructure 5 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 4 ★

It is bad due to the online mode, but it is great in the offline mode.

Placements: I do not know much about placements as I am in the 2nd year. The highest salary package offered in our course is 20 LPA, and the average salary package offered is 9 LPA, and the lowest salary package offered is 4 LPA. A top recruiting company that visits our campus for placements is Samsung Semiconductor. For non-tech courses, Deloitte company visits our college to hire students for a role of a business consultant. An internship offered in the core sector is rare. Around 2 out of 100 students get an internship.

Infrastructure: The infrastructure of our college is top class. Labs, classrooms, and a library have enough space. It also has Wi-Fi connectivity. The quality of the food served is average. There are separate grounds and courts for each sport. The canteen is average. Sports facilities are of top class. Medical facilities are also available here. Some labs are

small.

Faculty: Teachers in our college are knowledgeable and qualified. The teaching style of most of the professors is boring. The course curriculum is relevant, and it makes students industry-ready. Semester exams are average in difficulty, but checking is strict. Due to relative grading, the pass percentage is between 30-40%. If students score above 40% in academics, then it is safe. You have to pass separately in the end-semester exams.

Other: Due to JEE rank and circuital branch, I have chosen this course. The course has robotics, semiconductors, and coding, so it is good to have a diverse course curriculum. The teaching style should be more practical, and subjects can be reduced in our course. There are about 10,000 people on the campus. The connectivity is awesome as the metro is nearby the college. Teaching is on the online mode, so I cannot say about fests.

3.2 ★★★☆☆ Placements 3 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 2 ★

It is a good college, but the administration department is very strict.
Placements: The college has 100% placement record. The highest package offered is 1.25 Crore per annum, and the lowest package is 4 LPA, and the average package is around 12-15 LPA. The top recruiter is Goldman Sachs. About 30% of students got internships. But the internships for branches like CSE, IT, etc., is more than 80%. Students also got PPO offers. Software developer is the top role offered.

Infrastructure: The infrastructure is average, and the fee is high. Food is average. It is better to take a PG nearby which has much better facilities than what the college provides. Wi-Fi is good. The library is well maintained.

Faculty: The teachers are old and experienced. They teach authentically, but it could be boring at times. But they do have the required knowledge. The course curriculum is too old and not relevant, but the college is trying to bring about some changes in order to develop students' interest. The pass percentage is 40%, and there is a relative GPA system.

★★★★☆ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 4 ★

NSUT provides perfect placement opportunities for students.

Placements: A high number of students gets placed every year during campus placements. Many internationally acclaimed tech giants like Google, Amazon, Microsoft, Facebook and core companies like Honda, etc., visit the college every year looking for possible recruits. The highest salary package of 1.25 crores per annum has been recently offered by Google during campus placements. The average salary package offered is 8-10 LPA every year to students, and a high number of students gets placed every year. Therefore, NSUT is a perfect college to get placements if you are looking for it.

Infrastructure: Infrastructure is very good, with state-of-the-art facilities in labs and classrooms. The whole campus is high-speed Wi-Fi enabled. Classrooms and library are well-equipped to satisfy all of the students' needs. A separate section of the campus is allotted for the sports complex with facilities for playing cricket, football, volleyball, basketball, track, field, etc. The complex also contains a gym, indoor badminton and table tennis courts for students' daily use. A very hygienic canteen is also available with good quality and affordable food. The college has a 24-hour doctor presence infirmary in the case of any emergency. Overall, the infrastructure is very good.

Faculty: Faculty members are highly qualified and are more than qualified to help students in their academic development. Almost all the teachers have doctorate degrees in their field from respectable institutes like IITs. The course curriculum is well up to date and progressive with the ongoing developments in the industrial world. Semester exams are fairly difficult, so students require a full-scale knowledge of the theoretical and practical aspects of the subject.

Other: The college hosts annual fests and all year round activities like hackathons and treasure hunts to ensure students overall development. The college is very well connected and within touching distance of metro and bus services. The campus has a whole array of plants and birds, which provides a very good atmosphere for learning.

Reviewed on 27 Sep 2021

4.2

★★★★☆   Placements 5 ★ Infrastructure 4 ★ Faculty & Course Curriculum 3 ★ Crowd & Campus Life 4 ★

Overall, this college is the best.

Placements: NSUT is one of the top institutes of engineering in India as we all know it also has NRF ranking of 74. It is mainly famous for its placements. The average salary package offered to a CS student is somewhere around 18 LPA to 19 LPA. The highest salary

package offered is 1.25 crores which is an international salary package. All the top MNCs visit the campus.

Infrastructure: The infrastructure of the college is average here but NSUT focuses on its infrastructure improvement by making a newly well fully air-conditioned auditorium, classes, and new hostel accommodation for boys and girls. As we all know hostel life in a college is matters a lot in a student's life.

Faculty: Here you can find a maximum number of teachers who are well qualified. But some professors are more focused on just covering the syllabus, no matters whether the student understands it or not. Every engineering student had a well past with exams, and they know how we can handle this situation.

★★★★☆   Placements 5 ★ Infrastructure 3 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

Study hard and crack JEE to get your dream branch here.

Placements: Placement was good, the students in top branches were easily able to get good companies with great package. Tech giants took good numbers of students this year. Inspite of this pandemic placement were worth it. Mainly roles like SDE, software developer are offered here.

Infrastructure: Hostels building are good. Foods are supplied in packets and yes canteen is quite expensive than outside and other colleges. Food is good in quality and a lot of variety is available here. You can get Wi-Fi connectivity all over the college campus and yes you get a mind blowing speed too.

Faculty: Curriculum is updated and faculty members are old and have good experience to clear whatever doubt we raise. Semester exams are tough and you won't be able to clear the cutoff percentage without studying regularly. Teachers are also strict and don't do lenient marking.

Other: My course is IT. A lot number of placement came through this branch. The demerit is only online classes due to which we lack interaction with our friends and teachers.

🎓 shiksha

It is a place where students can excel in every way possible.

Placements: If students work hard, then they will get good placements. There are many techs and non-tech companies that visit the campus to offer jobs to the students. Many of them are big companies like Google, Microsoft, Adobe, Flipkart, Amazon, and many are in non-tech also. They have a good structure for internships. Students who want to apply for internships can apply and get if their work is deemed.

Infrastructure: I am a day scholar, so I do not know about the hostel facility. But some of my batch mates who live in the hostel say that there are bad arrangements for food and also hygiene is not good. The infrastructure of this college has the most beautiful campus with greenery and proper maintenance of all the trees on the premises. The Wi-Fi is good and the laboratories are fairly good. Library provides a perfect environment to study and explore other things.

Faculty: Some teachers are helpful but some of them are not good. They all are handsomely knowledgeable, and some of the teachers don't know how to teach properly. Semester exams are very tough, since the semester is short due to covid-19.

Other: I opted for this course, because I want to explore things and wanted to do many things in life. This course provides the best opportunities to do so. There are not many events held as all the classes have been going online due to pandemics. But those events which are being organised online are fun and informative as well.

Review of Netaji Subhas University of Technology.

Placements: NSUT is formerly known as NSIT. The best thing about NSUT is its amazing placement records and the various placement options it offers. It is top-notch and is comparable to top IITs. Total offers this year for B.Tech students were a bit above 1,000, and for the COE department, there were more offers than eligible students. Almost all students got placed in top branches. Among all of the placed students, 72% of the students got placed in tech companies. Almost 16% of the students got placed in non-tech companies, and the rest 12% of the students got placed in core companies. Top 10 tech companies include Atlassian, DE Shaw, Microsoft, Google, Amazon, Flipkart, Sprinklr, Salesforce, Walmart and Intuit. Top 10 non-tech companies include Brain & Company, KPMG, E&Y, JP Morgan, Mckinsey & Company, Deloitte, Blackrock, Landmark Group, BCG

🔺shiksha

and Thorogood Associates. Top 10 core companies include Vedanta, Hero Motocorp, Betchel, Anand Automotive, Federal-Mogul Powertrain, Ansys, Synopsys, Texas Instruments, Qualcomm and Samsung. Some other companies include giants in the world market like Tata, Oracle, Morgan Stanley, Infosys, Goldman Sachs, Adobe, Uber, Arcesium and many other leading companies. These companies offer placements with various job profiles such as software developer, web developer, app developer and in tech fields. The salary package offered can go as high as 1.25 crores per annum in 2016. The highest salary package offered in 2019 was 50 LPA, the lowest salary package offered was 4 LPA, and the average salary package offered was around 8 LPA. Various companies offer internship opportunities as soon as third-year starts, including several tech giants mentioned above with a stipend ranging from Rs. 30,000 per month to as high as 1.5 lac per month. Also, one of our seniors got an internship from Arcesium with a stipend of 1 lac per month.

Infrastructure: Infrastructure has improved massively over the years, and our college is continuing its improvement. Apart from having abundant well-spaced classrooms and an adequate amount of classrooms, more than 10 huge lecture halls are developed with massive screens to facilitate smart education. These structures are named APJ Complex. Our university is equipped with a student centre which caters to the need of students. Good speed Wi-Fi is available all over the campus. There is a huge library with centralised air-conditioners, and it is well-ventilated to keep a fresh environment. A very wide variety of books are available in every department, and books can be issued very easily. The library is open almost all the time, even when classes are going in online mode. Labs are amazing and well-equipped with the latest technologies. I am in the COE department, and computer labs have more than 300 computers with a large screen and advanced i7 intel processors. It is well-functional and connected to the internet, and it can be used at any time for coding and various educational purposes. Electronics labs also have almost every instrument. Labs are a huge added advantage in NSUT. Hostels are average, but they are manageable. There are 4-5 hostels with single and double bedrooms. There are separate hostels for girls and boys and also separate hostels for different year students. Hostel facilities are good enough. They provide 4 meals a day like breakfast, lunch, snacks and dinner. There is a well-guided registration process for accommodation. Students from outside Delhi are up the preference order for hostel accommodation. There are badminton and volleyball courts inside the hostel, which students can play along with other games. Medical facilities are also good, and a doctor is also available to take care of students.

Faculty: The biggest pros about NSUT is its course curriculum. Relevant subjects

according to our allotted branch are included in the syllabus from the 2nd semester, unlike other major institutes, including IITs which do it in the 3rd semester. We start early on important topics as compared to other colleges. It helps a lot to plan our studies. Courses are well-designed to make students industry-ready as relevant subjects are taught. We can choose our own electives even from subjects of other departments. Students are asked to work on various important projects to help them further in their placements. Teaching quality is at par with other famed institutions, and some teachers are well-qualified. NSUT is one of the few colleges in the country which focuses on education, and scoring marks is not very easy in NSUT. Students must have good knowledge about their particular subject to score well. Regular assignments and class tests are conducted to check the progress of students. Mid-semester and end-semester are moderately tough, which checks students on various aspects, and it comprises of questions from all over the syllabus.

Other: I have chosen this course because COE is the best branch with the best placement opportunities. It is one of the most versatile branches across all courses offered by NSUT. You get to learn much about the modern-day internet world, etc. NSUT has various fests, and Moksha is the annual fest with huge participation from students. There are many societies for different extracurricular activities, and auditions are held yearly to join them. They are a lot of fun, and it helps social interaction and helps grow confidence among students alongside having fun in college.

★★★★⯪   Placements 4 ★ Infrastructure 5 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 4 ★

I had excellent four years in NSUT.
Placements: Around 90% of students were placed from information technology. Some students even got 2 offers, but as the intake of students had increased since 2019, so the placement rate has decreased a bit. The average salary package offered is around 12 LPA. Mostly every reputed company visits our campus for internships and placements like Google, Microsoft, Uber, Zomato, Sprinkler and many more. Top roles offered here are junior SDE, associate product engineer, etc. But internships are not provided for every student because only around 30 to 70 students got internships.

Infrastructure: Our college has a lush green campus in reality with many tree species. It is spread over 150 acres, and I had not even seen the entire campus until now. There are 2 canteens, and one is well built with air-conditioners and a study area inside. The other

canteen is just a temporary type and named Amul, where you will get nearly everything. There are many hostels with air-conditioning and non-air-conditioning facilities. Everything is provided in these hostels. The best part of the campus is the newly built APJ complex, where the 1st year students have lectures. APJ complex has many air-conditioners, a huge sitting capacity and even a mic for students to ask questions and a PC for teachers. Moreover, APJ complex has a huge projector and screen. Even the washrooms are not less than the washrooms of hotels.

Faculty: Almost every teacher in NSUT has great knowledge. They teach very well, but few teachers are not good. They just attend college forcefully to teach. Semester exams in our college are really difficult, and results are declared almost a year late.

Other: The crowd in NSUT is very good, but I suggest you beware and be attentive to whom to speak and to whom not to speak because it is a college and not a school. Girls are less in number. Many fests are held every year, and the biggest fest is Moksha. There are a lot of societies where you can show your talent and gain some practical knowledge. Our college is situated in the main city of New Delhi Dwarka, and the nearest metro station is Blue Line Dwarka Mor. It takes around 10 minutes to reach the metro station by walk. Our college also provides scholarships to economically weaker group students and also provides a loan facility. So, you can definitely choose NSUT.

2.2
★★☆☆☆   Placements 3 ★ Infrastructure 1 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 2 ★

It has an average college with a poor campus and more fees.

Placements: I do not have any idea about placements. During admission, faculty members said that we get placement from the main campus. We can get better placements in the mechanical engineering course in the main campus present in Dwarka.

Infrastructure: The infrastructure of our college is poor. The college is formerly known as Choudhary Brahm Prakash Engineering College before the collaboration with NSUT. The fee was only Rs. 40,000, but now the fee is above 2 lacs. It does not offer any hostel facility. There are no labs for the mechanical engineering course.

Faculty: Faculty members in our college are average. Many faculty members are mainly from the main campus, but I think they taught only for our online classes. The course curriculum and exam papers are the same as on the main campus. It took an exam during the lockdown

in offline mode, and the papers were very tough.

Other: It has to improve the campus and introduce some good faculty members.

★★★★☆ Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 5 ★

I am satisfied to be a part of this college.

Placements: The average salary package offered for the batch of 2020 was above 17 LPA. Most of the students from the computer science branch got placed with an above-average salary package in companies like Amazon, Microsoft, etc. Students from core branches also get great salary packages from companies like Texas and IBM.

Infrastructure: In terms of infrastructure, it is one of the best. It has well-equipped labs with the latest computer. The electronics lab is well-equipped with all kinds of instruments and apparatus for students. The newly inaugurated APJ complex has spacious air-conditioned lecture halls.

Faculty: After being upgraded to NSUT from NSIT, the entire syllabus has been restructured so that irrelevant and non-industry required courses are removed. It makes students the best ready for the placement point of view. Regular exams are conducted even in the online mode. Some teachers are helpful. They hold regular tutorial and doubt classes.

Netaji Subhash University of Technology is a dream college.

Placements: NSUT has the distinction with one of the highest placement records in the country. Placements are what attracts us, and the packages ranging from 70 LPA to 1.5 Crores are offered. It is the highest till date offered by Google. Around 90% of students get placed, and almost 100% from COE and related branches. Google, Amazon, Microsoft, and Facebook are the top recruiters for internships as well as placements. The top roles offered are software engineer, web developer and quality assurance.

Infrastructure: To be honest, the infrastructure is decent. The campus environment is friendly and helps us maintain a spirit of good vibes, along with a proper learning environment. It is quite nice. Our college organises many events. The quality of food, Wi-Fi

and hostel is good.

Faculty: The teachers are quite helpful and research-oriented. They help us understand the topics easily. Apart from that, the curriculum for computer engineering is up to date with the latest technologies like machine learning and data mining. Semester exams are tough, and you should prepare well.

Other: The placements are the main attraction for our college. If you want to have fun in college with a 100% guarantee for your future, join NSUT for the best experience of your lifetime. A fest called Moksha is held here.

3.8 ★★★★☆ Placements 4 ⭐ Infrastructure 4 ⭐ Faculty & Course Curriculum 3 ⭐ Crowd & Campus Life 4 ⭐

Our college has a great tech culture.

Placements: In the previous year, almost 100% of the students of our course got

placements offers. The highest salary package offered was by Microsoft. Mostly every top company you can think of in tech visits our campus whether it is Facebook, Google, Microsoft, etc. Many students get internships too but it is not that good as placements for on-campus internships you have to work hard to get into big company as an intern. Roles they offer are as software engineers.

Infrastructure: The infrastructure is excellent. Recently new complex was built on our campus named APJ Abdul Kalam Complex which has smart projectors, high-quality and air-conditioned classes. We also have a canteen with great food items. The Wi-Fi on the campus is great without buffering. Here we have medical and sports facilities too.

Faculty: Professors are average. They are qualified and knowledgeable legendary professors but they are numerous. There are lazy professors too who never teach or kind of. The curriculum is good but make sure it will not make you ready for the practical implementation or industry-ready. You have to study yourself from the internet to get knowledge or practice to crack top companies. College is just going to give you the opportunity to sit for the company placements that's all rest you have to work hard. Semesters exams aren't that tough there is relative grading in our university and there is no particular passing percentage. The great plus point of this university is placements. No matter professors teach you or not but people get industry-ready by themselves not only in our college, but even this also happens in IITs too only private colleges like BITs Pilani, IIIT Hyderabad, etc., have great legendary professors.

Other: I am pursuing computer engineer. I am always interested in tech wanted to learn and pursue it so I have chosen this course. Even placements in this course are good as well we know that software engineers have higher packages. The tech culture of our college is amazing, and seniors help you through your difficulties. Events are fine not too good as IIT Delhi or DTU in Delhi. We have scholarship systems. We have a lot of societies with great talents where you can make good friends and groups.

Review of Netaji Subhas University of Technology.

Placements: Placements in our college are good. Every year top recruiting companies visit our college to hire students both for internships and campus placements. Top product-

based companies like Google, Facebook, Amazon, etc., visit our college and provide huge salary package based on students performance. Our college also has a startup incubator that helps students to have their own startups.

Infrastructure: The infrastructure of our college is great. All the classrooms and lecture halls are fully air-conditioned. The college provides 3 boys hostels and 2 girls hostels. The canteen and mess facilities are awesome. It provides both vegetarian and non-vegetarian food. The college has 2 tennis lawns, a huge football ground, table tennis, basketball courts and badminton courts. Overall, sports facilities are good here. It also has Wi-Fi connectivity all around the campus.

Faculty: The prominent feature of NSUT is that it has a vast number of faculty members and professors who are highly qualified. They often have completed their studies at foreign universities. They are helpful. The college has multiple branches with specialisation in leading technologies. The course curriculum is up to the point and easy to follow. Exams are conducted in a very timely manner with a pass percentage of 75%. One has to also maintain a described attendance percentage to be able to give exams.

Other: Our college is famous for organising its technical fest named MOKSHA once a year. It is a 5-day long fest where many famous singers and actors come to perform. It also organises many other competitions for students to showcase their skills. It also has numerous societies in which students can join based on their interests.

★★★★☆   Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 5 ★

I like being here as it provides chances and an environment for students to reach their potential.

Placements: Our college is famous for placements. Almost 90% of the students got jobs from companies from the campus, which is pretty impressive. In our branch, it is even higher. Top recruiting companies in our branch are usual like Google, Microsoft and other tech companies. Our branch mainly deals with circuits, semiconductors, etc.

Infrastructure: Classrooms are modern with presenters and a huge TV, which is operated by laptop so that we can have a more interactive experience. Chairs are relaxing, and rooms are wide airy and spacious with air-conditioners all around the corners. In the hostel, you may get a single room or a double depending on your choice. A single room has more fee

than a double room. The security of students in our hostel is marvellous, and they take good care of our needs. Whilst you may not get an air-conditioned room, and they won't even allow an air-conditioner. Other than that, it is pretty good. The food quality is decent enough. You can get breakfast, lunch, evening snacks and dinner. There are 3 canteens on the campus, and all are subsidised for students. You can get pretty much everything for your need.

Faculty: Teachers are always supportive. Even in online classes, they take their time to make sure students get everything they need from them. In this college, students are always giving exams in the form of ST, LT, VT and assignments, and they are quite difficult. Getting a good grade in NSUT is not an easy task, so you have to work hard to get it.

Other: You can't take direct admission in NSUT. You have to participate in JAC Delhi counselling, which consists of 3 main colleges named DTU, NSUT and IIIT Delhi. I got production and industrial engineering in DTU in round 4. Then in an up-gradation round, I got promoted to mechanical engineering in NSUT, and then in the internal up-gradation round, I got another promotion to EIOT in NSUT. If you want a good branch, then you have a make sure you get something in the primary 4 rounds. As it is a pandemic time, we haven't experienced any event, but as per previous year experiences, they all are very good.

4.2

★★★★☆   Placements 4 ★ Infrastructure 4 ★ Faculty & Course Curriculum 4 ★ Crowd & Campus Life 5 ★

It offers an amazing college life, and the placements are very good.

Placements: 98% of students got placed. The highest package offered is 1.25 Crore per annum, and the average package is 20 LPA, and the lowest package is 3 LPA. Approximately 40% of students are able to crack the interview of internships in companies like Google, Microsoft, Amazon and Adobe. The top recruiting companies are Google, Microsoft, Adobe, Sprinkler, PhonePe etc.

Infrastructure: Facilities and infrastructure are very good. Wi-Fi is available on campus. The classrooms and labs are air-conditioned. Highly managed and well-equipped computer labs are available. Hostel facilities are not too good. Mess food is not much nutritious. Sports facilities are amazing.

Faculty: The teachers are highly qualified and experienced, but senior teachers are not much interested in students welfare, but the overall teaching is nice. The course curriculum is irrelevant, and it makes the course boring. Semester exams are tough compared to other

ᔑshiksha

colleges.

Other: I chose CS because I want to gain knowledge about technologies and earn good money.

5.0
★★★★★   Placements 5 ★ Infrastructure 5 ★ Faculty & Course Curriculum 5 ★ Crowd & Campus Life 5 ★

It is the best college of engineering.

Placements: From the 7th semester, students are eligible for placements. The percentage of placement in the core courses is 85%, and in tech courses, it is 100%. The highest salary package offered is 1.25 crore per annum, and the lowest salary package offered is 6 LPA. Top recruiting companies like Google, Amazon, Ola, Schlumberger, Uber, etc., visit our college for placements. A top role offered is a software engineer. About 85% of the student from our course got an internship.

Infrastructure: The speed of the Wi-Fi facility is good. The library is huge which contain more than 2 lacs books. Our college provides very good and hygienic classrooms. The rooms in the hostels are clean and good. The rooms contain one bed, chair, table and almirah. The taste of the food served in a mess is good.

Faculty: Teachers in our college are helpful and knowledgeable. Their teaching quality is so good. They clear each and every doubt of students. The course curriculum is very relevant to the students. They conduct short tests, long tests, quiz tests, mid-term and end sem. The difficulty of the exam is moderate.

Other: I have chosen this course because I had a curiosity to know how the machine works from my childhood. Many people from our family are from a mechanical background, so I am pursuing mechanical engineering from NSUT. The main fest of NSUT is Moksh, which is conducted between March and April. The ratio of girl and boy is 1:14. Scholarships are available for SC, ST and OBC students and also for those students who get less than 2000 rank in JEE Main.
